

UNITED KINGDOM CONFORMITY ASSESSMENT

1 **UK TYPE EXAMINATION CERTIFICATE**

2 Component intended for use in a Product or Protective System for use in Potentially Explosive Atmospheres
UKSI 2016:1107 (as amended) – Schedule 3A, Part 1

3 Certificate Number: **CSAE 23UKEX1065U** Issue: **0**

4 Product: **The Cable Transit Devices**

5 Manufacturer: **Roxtec International AB**

6 Address: **Box 540
SE-371 23 KARLSKRONA
Sweden**

7 This product and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

8 CSA Group Testing UK Limited, Approved Body number 0518, in accordance with Regulation 42 of the Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres Regulations 2016, UKSI 2016:1107 (as amended), certifies that this product has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of products intended for use in potentially explosive atmospheres given in Schedule 1 of the Regulations. The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements has been assured by compliance with:

EN IEC 60079-0:2018 EN 60079-7:2015 EN 60079-31:2014

Except in respect of those requirements listed at Section 16 of the schedule to this certificate. The above standards may not appear on the UKAS Scope of Accreditation, but have been added through flexible scope of accreditation, which is available on request.

10 The sign "U" placed after the certificate number indicates that this certificate must not be mistaken for a certificate intended for an equipment or protective system. This partial certification may be used as the basis for certification of an equipment or protective system. Any limitations are listed in Section 15.

11 This UK TYPE EXAMINATION CERTIFICATE relates only to the design and construction of the specified product. Further requirements of the Regulations apply to the manufacturing process and supply of this product. These are not covered by this certificate.

12 The marking of this product shall be in accordance with Regulation 41 and include the following:

II 2GD
Ex eb IIC Gb
Ex tb IIIC Db

Name: M Halliwell 
Title: Director of Operations

13 DESCRIPTION OF PRODUCT

The Cable Transit Devices 'CTDs' (see Type Designation below), for use with circular cables both armoured and non-armoured or corrugated cables (see Corrugated cables below) of non-interrupted and non-metallic outer jacket type or conduits. The CTDs consists of multi diameter sealing modules (type RM Ex and CM Ex as standard or with EMC properties) that depending on each individual size, accepts a limited number of cable diameters in applicable types of frames or sleeves and shall be marked with the Ex-symbol.

The modules are made of mirrored rubber profiles and each part has a number of thin rubber layers that are ending up with a solid rubber core. The layers are made with two different colours to make the adaption to a cable exactly same on both halves and are allowed to differ one layer at most. To achieve appropriate sealing and mechanical properties to prevent the cables from slippage there shall always be a visible separation between the sealing module halves.

The modules made of EPDM are available with layers and core, but some greater sizes are also available without the core. In addition, there are also single diameter- and solid modules.

The correct sizes and procedure of assembling the cables to the modules are described in detail in the enclosed installation instructions. Ex Compression devices are used to achieve appropriate compression of the modules and solids some CTDs uses compression units that expands inside the CTDs and some others have incorporated solid rubber profiles that achieve the expansion.

There are also two types of CTDs that incorporates both the compression device and multi diameter modules as a single unit, but still with two halves. The method to assemble the compression devices etc. and to achieve sealing of the CTDs is described in detail in the enclosed installation instructions.

The Ex-components does not have a defined and incorporated sealing against the final enclosure wall and there are needs for supplementary type examinations and certification.

Most CTDs that has a rectangular opening with or without rounded corners with modules of type RM Ex are all available for different combinations with several openings in width and/or in high. CTDs for use with rectangular openings with CM Ex modules (one type with dual opening) and round sleeves are only available with single openings.

The CTDs installation instructions listed in the certificate Annexe will define each variant in detail and all applicable parts that are approved for use within that variant.

Type Designations:

S...-, S...S0...-, S...WM-, SRC...-, SK...-, SBTB...-, SF...W-, G...W-, B...C-, R...W-, RO...W- and RS...W Ex

Temperature Range:

-60°C to +80°C

Corrugated cables for use with: S...-, S...S0...-, G...W- and SF...W Ex

ACIC (Armoured Control and Instrumentation Cable) according to C22.1-06 CEC,

ACWU (Armoured Cable for Wet locations) according to UL4,

TECK90 according to C22.2 No. 131-07

MC (Metal Clad) according to UL1569.

SCHEDULE

UK TYPE EXAMINATION CERTIFICATE

CSAE 23UKEX1065U
Issue 0

The following amendments have been implemented into the product description in the ATEX Certificate NEMKO 12ATEX1279U Issue 1 and 2:

New variant of BG modules added. (Issue 1).

Additional variants of frames included: RO...W, SK..., SBTB... and S...WM. Additional EMC Wedge, welding instructions changed and marking of EMC modules added. (Issue 2).

14 DESCRIPTIVE DOCUMENTS

14.1 Drawings

Refer to Certificate Annexe.

14.2 Associated Reports and Certificate History

Issue	Date	Report number	Comment
0	27 November 2023	R80092836A	The release of the prime certificate.

15 SCHEDULE OF LIMITATIONS

- 15.1 For maintaining the explosion protection, the installation instructions that accompany the products shall be considered.
- 15.2 Only cable for fixed installation is permitted for the cable entry.
- 15.3 For optimum reliability wait 24 hours or longer after installation before exposing the cables/pipes to strain or pressure.
- 15.4 For cable transit devices certified as an Ex component and marked with the symbol U (cable transit device of types S..., S...S0..., S...WM, SRC..., SK..., SBTB..., SF...W, G...W, B...C, R...W, RO...W and RS...W), compliance with applicable requirements not covered by sub-clauses listed in Annex B of Part 0, shall be verified. This includes mechanical test (if applicable) and test of degree of protection IP, which shall be carried out on the frame of the cable transit device (excluding modules and compression unit) after it has been mounted on the enclosure of the apparatus subjected to test and certification.

16 ESSENTIAL HEALTH AND SAFETY REQUIREMENTS (REGULATIONS SCHEDULE 1)

In addition to the Essential Health and Safety Requirements covered by the standards listed in Section 9, all other requirements are demonstrated in the relevant reports.

17 PRODUCTION CONTROL

- 17.1 Holders of this certificate are required to comply with production control requirements defined in Schedule 3A, as applicable, and CSA Group Testing UK Regulations for Certificate Holders.
- 17.2 UKCA label must always be used with the ATEX and IECEx main marking label to provide all the required information in accordance with clause 29 of EN IEC 60079-0: 2018.
