General information

Installation and maintenance: For European member countries of GENELEC, shall standard EN 60079-14 and EN 60079-17 be considered.

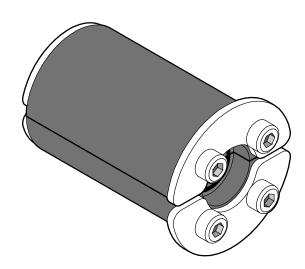

For countries members of IECEx shall standard IEC 60079-14 and IEC 60079-17 be considered. For other countries shall applicable national regulation be considered.

The products fulfill the following standards: EN 60079-0:2012, EN 60079-31:2009 IEC 60079-0:2011, IEC 60079-31:2008

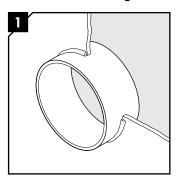

Installation instructions Cable transit device RS Ex

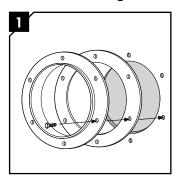

Sleeve for welding to structures (without flange)

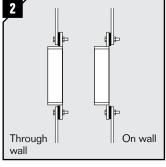

Weld the sleeve to the cabinet/ wall. Welding instructions available on www.roxtec.com

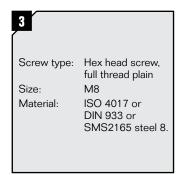

Sleeve for bolting to structures (with flange)

Use the sleeve as template for the drilling of the screw holes. Drill \emptyset = 8.5 mm.

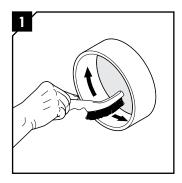

Attach the frame to the cabinet/wall using bolts and nuts. The rubber gasket shall be placed between frame and cabinet/wall.

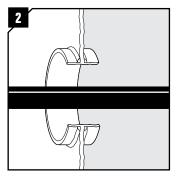

Required quality.

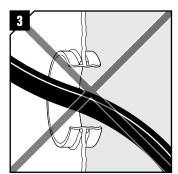

Installation of RS Ex seal

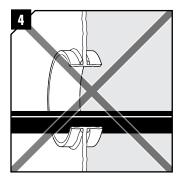

Clean the aperture.

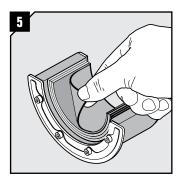

Feed the cable through the opening. The cable/pipe shall go straight and centered through the sleeve.

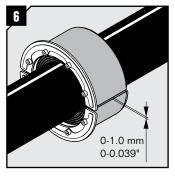

Not acceptable.

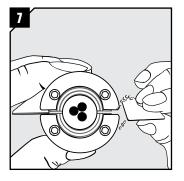

Not acceptable.

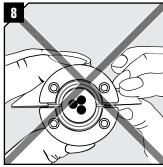

Adapt the seal by peeling off layers from the halves until you reach the gap seen in step 6. The number of layers may not differ by more than one between the halves.

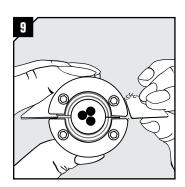

Achieve a 0-1.0 mm gap between the two halves when held against the cable/pipe.

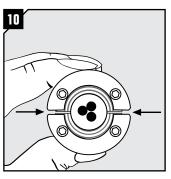

Measure the gap with the Ex gap gauge by holding blade one in one gap and checking the other with blade two.

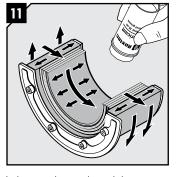

If the gap is too big, the gauge will slip in easily.

If the gap is correct, there will be no room for blade two.

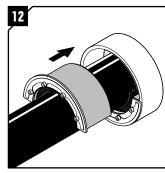

When checking without the gauge, there shall be a visual gap.

Lubricate the inside and the outside sealing surfaces with Roxtec Lubricant.

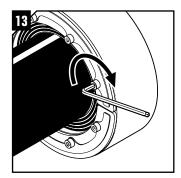

RS 23 Ex - RS 31 Ex RS 43 Ex - RS 100 Ex

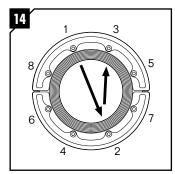

Insert the halves into the sleeve.

Max torque* (Nm)

4

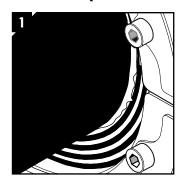

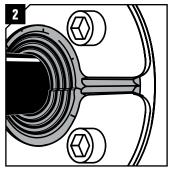

| RS 125 Ex - RS 150 Ex | 7 | | | |
|--|---|--|--|--|
| * The torque depends on several things, e.g cable or pipe size, amount of used lubricant, sleeve size or material in the cable sheet, etc. | | | | |

Tighten the bolts crosswise in small steps to firm compression.

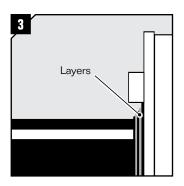

Check compression

Excess lubricant shall be visible after compression.

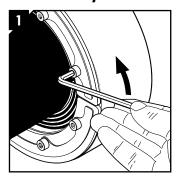

The rubber shall expand over the front fittings.

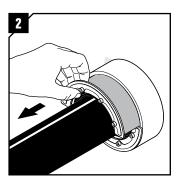

Rubber layers shall bulge outwards, if any.

Disassembly

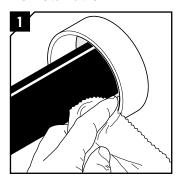

Release the compression by loosening the screws alternately.

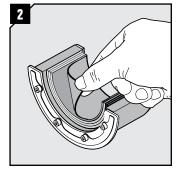

Remove the seal.

Reinstallation

Clean the sleeve.

Continue the reinstallation from step 5.

Note

- An incorrectly adapted seal shall be replaced (layers shall not be reused).
- \blacksquare Temperature range -60 to +80 °C.
- You find the EC Type examination certificate at www.roxtec.com, or contact your local Roxtec supplier.

Sleeve with flange, aperture dimensions for bolted installations

| | Recommended aperture dimensions | | Minimun clearance depth | |
|-----------|---------------------------------|--------|-------------------------|-------|
| Seal | Ø (mm) | Ø (in) | (mm) | (in) |
| RS 23 Ex | 34 | 1.339 | 28 | 1.102 |
| RS 25 Ex | 36 | 1.417 | 28 | 1.102 |
| RS 31 Ex | 42 | 1.654 | 28 | 1.102 |
| RS 43 Ex | 54 | 2.126 | 66 | 2.598 |
| RS 50 Ex | 65 | 2.559 | 66 | 2.598 |
| RS 68 Ex | 85 | 3.346 | 66 | 2.598 |
| RS 75 Ex | 91 | 3.583 | 66 | 2.598 |
| RS 100 Ex | 116 | 4.567 | 71 | 2.795 |
| RS 125 Ex | 142 | 5.591 | 71 | 2.795 |
| RS 150 Ex | 166 | 6.535 | 73 | 2.874 |

Theoretically recommended dimensions

Frame label:

RS Ex B (Bolting)

RS Ex W (Welding)

UKCA conformity marking

Can only be applied together with the ATEX and IECEx main frame label.

Applicable with Nemko 12ATEX1278X

Applicable with Nemko 12ATEX1279U

woc = without core

The following conditions for safe use (apparatus certified cable transit device) and schedule of limitations (U-marked component certified cable transit device) shall be considered according to the ATEX EC Type Examination certificates and the IECEx Certificates of Conformity:

- 1. In order to maintain the explosion protection, the installation instructions that accompany the products shall be considered.
- Only cable for fixed installation is permitted for the cable entry.
- 3. The cable entry is ready for use not earlier than 24 h after being tightened according to the installation instructions.
- 4. For optimum reliability wait 24 hours or longer after installation before exposing the cables/pipes to strain or pressure.

This includes mechanical test (if applicable) and test of degree of protection IP, which shall be carried out on the frame of the cable entry (excluding modules and compression unit) after it has been mounted on the enclosure of the apparatus subject to test and certification.

DISCLAIMER

"The Roxtec cable entry sealing system ("the Roxtec system") is a modular-based system of sealing products consisting of different components. Each and every one of the components is necessary for the best performance of the Roxtec system. The Roxtec system has been certified to resist a number of different hazards. Any such certification, and the ability of the Roxtec system to resist such hazards, is dependent on all components that are installed as a part of the Roxtec system. Thus, the certification is not valid and does not apply unless all components installed as part of the Roxtec system are manufactured by or under license from Roxtec ("authorized manufacturer"). Roxtec gives no performance guarantee with respect to the Roxtec system, unless (0 all components installed as part of the Roxtec system are manufactured by an authorized manufacturer and (10) the purchaser is in compliance with (a), and (b), below.

(a) During storage, the Roxtec system or part thereof, shall be kept indoors in its original packaging at room temperature.

(b) Installation shall be carried out in accordance with Roxtec installation instructions in effect from time to time.

The product information provided by Roxtec does not release the purchaser of the Roxtec system, or part thereof, from the obligation to independently determine the suitability of the products for the intended process, installation and/or use.

Roxtec gives no guarantee for the Roxtec system or any part thereof and assumes no liability for any loss or damage whatsoever, whether direct, indirect, consequential, loss of profit or otherwise, occurred or caused by the Roxtec systems or installations containing components not manufactured by an authorized manufacturer and/or occurred or caused by the use of the Roxtec system in a manner or for an application other than for which the Roxtec system was designed or intended

Roxtec expressly excludes any implied warranties of merchantability and fitness for a particular purpose and all other express or implied representations and warranties provided by statute or common law. User determines suitability of the Roxtec system for intended use and assumes all risk and liability in connection therewith. In no event shall Roxtec be liable for indirect, consequential, punitive, special, exemplary or incidental damages or losses."
