

Roxtec R-gennemføring

Rund anordning til tætning omkring flere kabler og rør i et begrænset areal.

Roxtec R er en kabel- og rørgennemføring til brug i rør-sleeves og runde huller. Komprimeringen er indbygget i rammen, så den tættes ved udvidelse. Standardtætningsmodulerne kan tilpasses kabel- og rørstørrelser og kan bruges til indbygget reservekapacitet i gennemføringen. Nettet på bagsiden beskytter under vandret montering (ikke inkluderet i R 70 og R 75). Rammen kan skæres åben til montering omkring eksisterende kabler og rør.

- Pladsbesparende
- Nem at vedligeholde og inspicere
