

Roxtec S transit with SE PPS

Transit for multiple plastic pipes.

The Roxtec SE PPS with S is an extension of a standard Roxtec transit for protection of multiple plastic pipe penetrations against the risk of fire. The seal allows for a mix of pipe materials (metal and plastic) and in some cases cables within the same opening. The S frame is for welding to the structure. The standard sealing modules are adaptable to cables and pipes of different sizes, and can be used to build in spare capacity in the transit.
