

Roxtec SF transit with SE PPS

Transit for multiple plastic pipes.

The Roxtec SE PPS with SF is an extension of a standard Roxtec transit for protection of multiple plastic pipe penetrations against the risk of fire. The seal allows for a mix of pipe materials (metal and plastic) and in some cases cables within the same opening. The transit frame has a flange which simplifies welding to unprecise holes. The standard sealing modules are adaptable to cables and pipes of different sizes and can be used to build in spare capacity in the transit.

Easy to maintain and inspect
