

Openable transit for sealing around existing cables/pipes.

The Roxtec R with SLFO/RI is a transit with sleeve for cables and pipes. The compression is integrated in the transit frame so it seals by expansion in the sleeve. The standard sealing modules are adaptable to cables and pipes of different sizes, and can be used to build in spare capacity in the transit. The net on the backside protects during horizontal installations (not included in R 70 and R 75). The frame is easily cut open for installation around existing cables or pipes. The openable sleeve is bolted to the structure.

Perfect for retrofit

Watertight

EMI protection

Mounting type

Bolting

Structure of installation

Metal

Fire rated

- **Supports**
 - Potential equalization
- Electromagnetic shielding
