

Roxtec R EMC transit

Round transit for EMC, for area efficient sealing of multiple cables and pipes.

The Roxtec R EMC is a cable and pipe transit ensuring electromagnetic compatibility. The transit frame is designed to be installed into conductive pipe sleeves. The compression is integrated in the frame and it seals by expansion. There is a choice between Roxtec ES modules for electromagnetic shielding or PE modules that protect against conducted disturbances. The modules adapt to cables and pipes of different sizes, and can be used to build in spare capacity in the transit. Roxtec EC (electrical continuity) test sticks are available to help indicate the electrical performance of the transit installation.
