

Roxtec SF BG™-gennemføring

Gennemføring for potentialudligning og jording med flange til svejsning.

Roxtec SF BG™ er en kabel- og rørgennemføring til potentialudligning og jording af armerede og metalbelagte kabler og rør. Rammen fås i forskellige materialer med en enkelt eller forskellige kombinationer af åbninger. Rammen er fremstillet i 10 mm tykt metal og har en flange, der gør det nemmere at svejse den ind i upræcise huller. Roxtec BG™ tætningsmodulerne tilpasses kabler og rør af forskellig størrelse og kan bruges til indbygget reservekapacitet i tætningen. Brug Roxtecs EC spændingstester til at få en indikation af den elektriske ydeevne for installationer udført med Roxtec BG™ eller ES.

- Nem at vedligeholde og inspicere
- Har indbygget reservekapacitet
