

# Roxtec GH transit for plastic conduits

Fire rated transit for plastic conduits.

The Roxtec GH for plastic conduits is a transit for bolting onto even structures like steel or sandwich walls/floors where there is a need for a fire rating. The rectangular steel frame allows for routing of conduits with high cable density. The Roxtec RM PPS sealing modules for plastic conduits are marked with corresponding NW size number to simplify installation. RM PPS modules can be combined with regular RM modules for a mix of conduits and cables in the same frame.

- Easy to maintain and inspect
- Provides built-in spare capacity
