

Roxtec FlamePlus™ transit

Lightweight transit with built-in knock-out functionality

The Roxtec FlamePlus™ is a multi-cable transit for bolting onto different structures. The frame modularity simplifies handling and logistics and lightweight design makes it ideal for sandwich panels while the wide flange provides clearance between bolts and frame aperture to minimize the risk of cracks when bolted to concrete or brick walls. The built in knock-out plate provides ingress protection during and after the construction phase.

The sealing modules adapt to cables of different sizes and can be used to create spare capacity.

- Light-weight
- Tightness during building phase
- Openable
- Modular design
