

Soluția Roxtec GOH FL100

Trecere care poate fi deschisă pentru cablurile existente, ce prevede o flanșă largă potrivită pentru fixarea prin înșurubare pe structuri de beton.

Soluția Roxtec GOH FL100 este o etanșare de cabluri și țevi care se poate deschide și care permite instalarea în jurul rețelelor deja instalate. Rama metalică dreptunghiulară are o flanșă de 100 mm lățime cu găuri pentru șuruburi aproape de perimetrul exterior pentru a asigura o fixare corectă și pentru a evita riscul de fisurare. Trecerea este alegerea potrivită atunci când se fixează prin înșurubare pe beton.

- Perfect pentru retehnologizare
