

# Roxtec S EMC transit

Transit for EMC, attached by welding.

The Roxtec S EMC is a multi-cable and pipe transit ensuring electromagnetic compatibility. It is available in different materials and with a single or various combinations of openings. The transit frame is produced in 10mm thick metal and is attached to the structure by welding. There is a choice between Roxtec ES modules for electromagnetic shielding and PE modules that protect against conducted disturbances. The modules adapt to a variety of cable sizes. Roxtec EC (electrical continuity) test sticks are available to help indicate the electrical performance of the transit installation.
